Profile

Full Stack Web Developer, seeking to leverage business, marketing and legal background to build and create enjoyable and dynamic websites for clients. Eager to join an innovative and quality-driven team at a company that strives to deliver exciting and new experiences for their client's needs.

Technical Skills

Languages: HTML5, CSS3, JavaScript, jQuery, JSON, Node.js, APIs and AJAX, React.js

Technologies: Passport

Databases: Firebase, MySQL, MongoDB, Sequelize and Mongoose ORM

Other: Github, Gitlab, Heroku, NPM, Bootstrap, Materialize, Microsoft Office Suite, SharePoint

Projects

Crystal Collectors – September 2019

Overview: Player will be given a random Target Score. Each time a crystal is clicked, its value is added to Your Score. Player wins by matching Your Score to the Target Score, and loses if above.

Github: <https://github.com/SNHoff53/Crystal-Collectors>

Deployed Page: <https://snhoff53.github.io/Crystal-Collectors/>

Languages: HTML, CSS, JavaScript/ jQuery

LIRI Bot – September 2019

Overview: This is a "LIRI" application. LIRI is a command line node app using API calls that takes in parameters and gives users back data.

Github: <https://github.com/SNHoff53/liri-node-app>

Languages: JavaScript, Node.js, Axios, Moment.js; APIs: Spotify, OMDb, Bands-In-Town

GifTastic – October 2019

Overview: User can choose from pre-populated gifs or add their own using the search bar.

Github: <https://github.com/SNHoff53/GifTastic>

Deployed Page: <https://snhoff53.github.io/GifTastic/>

Languages: HTML, CSS, JavaScript/ jQuery, APIs and AJAX calls

Bamazon – November 2019

Overview: This application is an Amazon-like-storefront, using MySQL. The app takes in orders from customers and depletes the stock amount from the store's inventory.

Github: <https://github.com/SNHoff53/bamazon>

Languages: JavaScript, Node.js, Node File System, NPM inquirer, MySQL

Experience

Operations Program Coordinator; Slalom; Seattle, WA; Feb 2019—Present

- Provided operational and administrative support for various internal programs.
- Created a SharePoint site, removing the need of hundreds of manual requests, enabling self-service and stream lining our processes relating to an internal learning program.
- Created list of action items to Cross Seattle Learning team, to ensure consistency of core class offerings for newly hired employees.

Cofounder; PNWRS, LLC; Mukilteo, WA; Oct 2014—Present

- Reviewed and analyzed current and proposed legislation to advance client interests.
- Assisted in the organization and management of client's campaign for city council.
- Negotiated contract expansions leading to the growth of client's business, including allowance for 3 new trucks and 6 new employees, which resulted in a commiserate expansion of client's business.

Practice Management Coordinator; Davis Wright Tremaine; Seattle, WA; Jun 2016—Feb 2019

- Redesigned critical budgeting spreadsheet leading to a 12% reduction of time required for budgeting tasks.
- Performed research, composed documents, and acted as a liaison between internal customers to support business development and client relations.
- Streamlined data by generating reports for attorneys and management using data retrieved from internal sources and Google Analytics.

Education

UW Professional & Continuing Education—Certificate; Full Stack Web Development; 2020

University of Washington—B.A. Business Administration; Int'l Business & Marketing; 2012
